Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of group I in Paper No. 6 is acknowledged. The traversal is on the ground(s) that group 1 is patentable and hence the dependent method of uses claims of groups II and III should be rejoined. This is not found persuasive because the group I, claim 1 is not patentable for reason given below. See MPEP 821.04 for rejoining of process claims for an allowable product. The traversal is also on the ground that search of the methods and the product is not burdensome. However, the three groups are classified in different class and subclass and the search required for each of the above inventions is not coextensive with regard to the literature, either. Further, a reference which would anticipate the invention of any one group would not necessarily anticipate or make obvious the any of the other groups. Applicant traverses the restriction requirement further on grounds that claim 8 is in both groups II and III. The reason for assigning claim 8 to the two groups is that claim 8 could be interpreted as means of expressing the antigen in a subject (group II) or in cell culture (group III).

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1642

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the core protein of a human polymorphic epithelial mucin" in line 5, but it is not clear what the metes and bounds are for the core protein of a human polymorphic epithelial mucin.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,054,438. Although the conflicting claims are not identical, they are not patentably distinct from each other because "the core protein of a human polymorphic epithelial mucin" is an obvious embodiment of "an antigen which comprises an antigenically active

segment...of a tandem repeat sequence of the core protein of a human polymorphic epithelial mucin..."
